

HDA Course

Master the Science and Practice
of Fitness Coaching

HDA Course

The fitness industry has grown rapidly over the last decade. Thousands of people enter the field every year, but very few develop the knowledge, clarity, and professional skills required to build a long-term career.

Most courses either focus only on **workouts and diet plans** or provide **surface-level information without practical application**.

The **HDA Course** was created to bridge this gap.

This course combines **exercise science, nutrition, coaching psychology, and real-world coaching strategies** to help students develop the knowledge and perspective required to succeed in the modern fitness industry.

Instead of memorizing isolated facts, students learn **principles, critical thinking, and practical coaching skills** that can be applied throughout their careers.

About the HDA Course

The HDA Course is built on a simple belief:

A great coach is not someone who memorizes information, but someone who understands principles and applies them intelligently.

This course combines multiple areas of knowledge that every successful coach must develop:

- Exercise science and biomechanics
- Applied nutrition science
- Coaching psychology and client management
- Programming strategies for real clients
- Business and marketing fundamentals

- Advanced coaching topics rarely discussed in traditional certifications

Every topic is explained with a focus on **practical application**, helping students translate theory into real coaching situations.

What Makes This Course Different

Many fitness certifications focus on memorization or simplified frameworks.

The HDA Course takes a **principle-based approach**, helping students develop deeper understanding and independent thinking.

Evidence-Based Understanding

Students learn the scientific principles behind training and nutrition rather than blindly following trends.

Practical Coaching Application

Concepts are explained through real coaching scenarios, helping students understand how theory applies in practice.

Critical Thinking and Research Literacy

Students learn how to read scientific papers and identify biases, allowing them to evaluate information intelligently.

Coaching Psychology and Communication

Understanding human behavior is essential for effective coaching. The course explores the psychological aspects of working with clients.

Business and Career Development

Students learn how to approach the fitness industry professionally and develop the skills required to build a coaching career.

Course Features

The HDA Course is designed as a **comprehensive learning experience** and it comes with a **lifetime access to all past, present, and future lectures.**

Structured Curriculum

The course is organized into multiple modules covering foundational knowledge, practical coaching strategies, and advanced topics.

Recorded Lectures

All lectures are delivered in a clear, structured format that students can revisit anytime.

Practical Coaching Frameworks

Students learn how to design training programs, build nutrition plans, and approach real coaching situations.

Real-World Perspective

Topics are discussed through the lens of real coaching experience rather than theoretical discussion alone.

Continuous Learning

Students are encouraged to develop the ability to learn, analyze, and adapt throughout their coaching careers.

Who This Course Is For

This course is designed for individuals who want to deepen their understanding of training, nutrition, and coaching.

It is ideal for:

- Aspiring fitness coaches who want to begin their coaching career
- Personal trainers who want to strengthen their scientific foundation
- Online coaches who want to improve their programming and client management
- Athletes who want to understand training and nutrition more deeply
- Fitness enthusiasts who want structured knowledge about exercise science and nutrition

Meet Your Teacher

Himanshu Deka

Himanshu has been working in the fitness industry since 2019, beginning his career as a personal trainer before transitioning into full-time online coaching. Over the years, he has worked with **350+ clients**, helping individuals improve their health, physique, and performance through structured training and nutrition strategies.

He has personally competed in **bodybuilding and powerlifting**, giving him practical experience in both physique development and strength training.

Why the HDA Course Was Created

Through years of coaching, Himanshu observed a common problem in the fitness industry.

Many coaches either rely only on **theory without practical experience**, or purely on **experience without understanding the science behind it**.

The **HDA Course** was created to bridge this gap — combining **scientific principles with real-world coaching application** to help students develop the knowledge and perspective required to become effective fitness coaches.

Course Structure

The HDA Course is divided into **seven modules**, progressing from foundational concepts to advanced coaching topics.

Each module builds upon the previous one, helping students develop both **technical knowledge and practical coaching perspective**.

Module 1

Understanding the Fitness Industry

Before becoming a successful coach, it is essential to understand the environment you are entering. This module explores the structure of the fitness industry, the value coaches provide, and the professional boundaries that every coach must respect.

Lecture Topics

- Introduction: Welcome to the Fitness Industry
- Understanding the Fitness Coaching Game
- Why Clients Pay Coaches
- Scope of Practice: What a Fitness Coach Can and Cannot Do
- Career Opportunities in the Fitness Industry

Module 2

Coach Mindset and Personal Development

Successful coaches require more than technical knowledge. This module explores the mindset required for growth, discipline, and intellectual honesty. Students also learn how to critically evaluate information and scientific research.

Lecture Topics

- Taking Control of Your Life and Career
- Self-Deception: Understanding Our Own Biases
- Building the Tools for Success
- The Three Essential Skills
- Confidence and Humility in Coaching
- Becoming the Person You Need to Be

Module 3

Scientific Foundations of Exercise

This module builds a strong understanding of human movement and exercise mechanics. By mastering these principles, coaches can design training programs that are both effective and safe.

Lecture Topics

- Gravity and Human Movement
- Force Production in Resistance Training
- Friction and stability
- Torque and Lever Mechanics
- Centre of Mass and Compound vs Isolation Movements
- Inertia and Momentum in Training
- Muscle Structure and Function
- Active vs Passive Tension
- Physiological Adaptation to Training
- Joint Reaction Forces and Injury Risk
- Active and Passive Insufficiency

Module 4

Applied Nutrition Science

Nutrition plays a central role in health, performance, and physique development. This module explains the science behind diet planning and provides practical tools for designing sustainable nutrition strategies.

Lecture Topics

- The Role of Nutrition in Health and Performance
- Energy Balance and the CICO Model
- Factors to Consider While Designing a Nutrition Plan
- Macronutrients: Protein, Carbohydrates and Fat
- Micronutrients and Their Role in Health
- Carbohydrates and Performance
- Blood Tests and Macro Calculations
- Gut Health and Digestion
- Vegetarian vs Non-Vegetarian Diet

Module 5

Business and Marketing for Coaches

Understanding exercise and nutrition is important, but building a successful coaching career also requires business awareness. This module focuses on developing the mindset and strategies required to grow as a professional coach.

Lecture Topics

- Business Mindset for Fitness Coaches
- Fitness Coaching Business Masterclass
- Fix Your Social Media Strategy
- Social Media Content Dissection
- Instagram Strategy for Fitness Coaches

Module 6

Client Programming and Practical Applications

This module focuses on applying scientific knowledge to real coaching situations. Students learn how to design effective training programs and adjust strategies for different types of clients.

Lecture Topics

- Nutrition Programming for Obese Clients
- Training Programming for Obese Clients
- Programming for Skinny Clients
- Understanding Training Volume
- Exercise Selection Principles (3 part series)
- RPE and Autoregulation
- Powerlifting Programming (2 part series)

Module 7

Advanced Coaching and Special Topics

The final module explores complex topics that experienced coaches often encounter in real practice. These lectures help students develop deeper insight into training methods, physiology, and advanced coaching scenarios.

Lecture Topics

- Estrogenation
- Contest Preparation
- The Best Training Methods for Hypertrophy
- Cooking Oils and Food Preparation Methods
- Equipment Analysis (3 part series)
- Pain and Injury Management (2 part series)
- Anabolics in Bodybuilding (2 part series)
- The Most Important Diet for Optimal Health (2 part series)

What You Will Gain From This Course

By completing the HDA Course, students will develop:

- A deeper understanding of **exercise science and biomechanics**
- Practical knowledge of **nutrition and diet planning**
- The ability to **design effective training programs**
- Skills to **analyze scientific information critically**
- Confidence to **work with clients professionally**
- A clearer understanding of the **fitness industry and coaching career**

A Course Designed for Long-Term Growth

The HDA Course is not designed as a quick certification.

It is designed to help students develop **real understanding, practical skills, and intellectual clarity** that can support a long-term career in the fitness industry.

The goal is not simply to provide information, but to help students become **thoughtful, capable, and responsible coaches**.

HDA MENTORSHIP

Develop the Skills, Clarity, and Authority Required to Build a Successful Fitness Coaching Career

Many fitness coaches enter the industry with genuine passion for training, nutrition, and helping people improve their lives.

However, building a successful coaching career requires more than technical knowledge.

Many capable coaches find themselves struggling with challenges such as:

- difficulty attracting clients
- uncertainty about online coaching
- inconsistent content and online presence
- lack of clarity about target audience
- discomfort with sales conversations
- confusion about positioning themselves as a coach

In most cases, the problem is not effort.

The problem is **lack of guidance and structured development**.

This mentorship is designed to provide that structure.

Through long-term mentorship, practical discussions, and continuous accountability, the goal is to help you evolve into a **competent, confident, and respected fitness coach**.

THE MENTORSHIP PHILOSOPHY

This mentorship is built on a few important principles.

Depth Over Shortcuts

The goal is not to provide quick tricks to gain virality on social media platforms.

The focus is on developing long-term competence as a coach and build personal brand.

Implementation Over Information

Learning ideas is easy.

Applying them consistently is what produces results.

Each week includes practical tasks designed to convert ideas into real progress.

Critical Thinking Over Blind Rules

Coaching is not about memorizing formulas.

It requires understanding how to analyze problems and make thoughtful decisions.

The mentorship focuses on developing this ability.

Professional Integrity

A successful coaching career is built on trust.

The mentorship emphasizes responsible coaching practices and long-term credibility.

THE MENTORSHIP DEVELOPMENT SYSTEM

This mentorship follows a structured development process.

Step 1 — Initial Assessment

The mentorship begins with understanding your current situation.

We evaluate areas such as:

- technical coaching knowledge
- communication skills
- sales ability
- online presence
- clarity of target audience
- accountability and work habits

This helps identify the **real bottlenecks** holding you back.

Step 2 — Personalized Development Roadmap

Based on the assessment, a personalized roadmap is created.

This roadmap outlines:

- where you currently stand as a coach
- which skills require development
- what strategies will help you grow

This document becomes the **foundation of the mentorship journey**.

Step 3 — Weekly Mentorship Sessions

Each week we conduct a mentorship call lasting **45–60 minutes**.

During these sessions we:

- review progress
- solve practical coaching challenges
- discuss important concepts and strategies
- refine your approach when necessary

At the end of each call, we define **micro-tasks for the coming week** to ensure consistent development.

Step 4 — Weekly Review and Accountability

Every session begins with reviewing the previous week's tasks.

We analyze:

- what worked
- what didn't work
- what should be improved

This creates a cycle of **continuous learning and implementation**.

Assessment

Personalized Roadmap

Weekly Mentorship Sessions

Implementation & Micro-Tasks

Accountability & Continuous Improvement

AREAS OF DEVELOPMENT

The mentorship focuses on four essential areas required to build a successful coaching career.

Coaching Knowledge

Understanding fundamentals, and problem-solving for real client situations.

Communication Skills

Learning how to explain complex concepts clearly and build trust with clients.

Sales and Offer Creation

Designing coaching packages, pricing strategies, and managing client conversations professionally.

Online Personal Branding

Developing a clear target audience, creating meaningful content, and building authority online.

MENTORSHIP STRUCTURE

Minimum commitment: **6 months**

Participants may also choose a **12-month mentorship** for deeper development.

The mentorship includes:

- One weekly mentorship call (45–60 minutes)
- Direct communication through WhatsApp
- Personalized development roadmap
- Continuous feedback and accountability

This mentorship is designed as a **long-term development process**, not a short-term course.

WHO THIS MENTORSHIP IS FOR

This mentorship is designed for:

- beginner fitness coaches building their foundation
- coaches struggling to get consistent clients
- trainers transitioning from offline to online coaching
- coaches who want to build authority through personal branding

The mentorship works best for individuals who are willing to:

- implement feedback consistently
- communicate honestly
- remain patient with the development process

APPLICATION PROCESS

If you are interested in joining the mentorship program and you share your confirmation

You will receive further information about the application process and next steps.
